

Guidelines for Replacement and Custom Cushions

To better serve you in finding the cushion or cushions you need, we ask that you come see us with certain basic information prepared.

- If you have your existing cushions - regardless of their condition - bring one or more to the store with you! We can more easily identify the best option for replacements once we have seen what you already have.
- If you do not have your original cushions, take good measurements of the width, length and depth of the seats and backs of your furniture.
 - In measuring, take into account any indentations required for the arms of the furniture.
 - Consider how your new cushions will need to attach and where.
 - Ties or velcro? - Back corners or top center?
 - If you need a one-piece seat and back cushion, be specific about where the hinge needs to be.
- Feel free to cut out a pattern from newspaper.
- Take a digital photo of your furniture and its surroundings to assist us in product identification as well as fabric selection.
- We have thousands of fabrics to choose from, including outdoor cording and fringes.
 - Each of our vendors stocks its own fabric lines, and most offer a large selection of fabrics directly from Sunbrella's collections. These fabrics generally start at about \$20.00, though prices vary depending on vendor and fabric grade.
 - We keep a variety of fabrics in stock, but selection varies.
 - You may also provide your own fabrics for custom cushions.

In summary, the more information you can provide us to work with, the better. We will be happy to assist you in working out cushion details, making fabric selections, and providing estimates for custom work.
